A PERFECT FIT

INTRODUCING SHAFTESBURYS RANGE
OF INTERIOR WOODEN SHUTTERS

WHY SHUTTERS?

Shutters have long been the window treatment of choice because they are incredibly functional and can provide great 'kerb appeal'. Shutters with adjustable louvres offer so much more in terms of privacy, ventilation and light control than any other solution.

WHY OUR SHUTTERS

Our "Simply Better" shutters have a unique new simple style that will integrate with contemporary or traditional interiors and all at affordable prices.

Our shutters come in four different material and cost options, are made exceptionally well, finished in long lasting UV resistant finishes and guaranteed for three years.

ECO STATEMENT

Our success and strength is built on the foundations of innovation, quality and conservation. We are very aware that our future depends on responsible management of the Earth's natural resources so we ensure that we use the most material efficient methods to make shutters that are known to us. This is what we call investing in conservation. Our competitors invest mainly in conversation.

HOW TO OWN OUR SHUTTERS

First, get an idea of price by supplying us with some rough window/door measurements for an instant quotation, and then arrange a survey. During the survey you will be advised on the many design choices with the help of a complete sample set and colour swatches. Priced accurately you may order there and then, a deposit is normally required. Fitting is approximately 6/8 weeks from receipt of order.

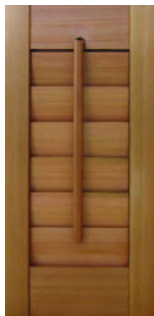

THE SHUTTERS

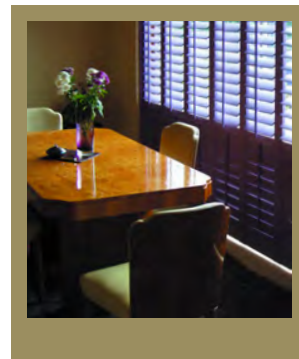

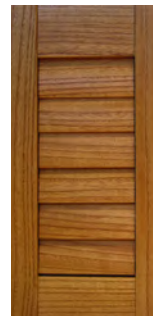

THE PREMIUM VANCOUVER RANGE

Constructed in Western Red Cedar, (which is acknowledged by all as the best timber for technical and aesthetic reasons) and available in painted, laquered or oiled finishes. It is used in its oiled form extensively in loft style apartments, barn conversions and really anywhere where you need to achieve a very natural look.

THE PHOENIX RANGE

Phoenix hardwood is very light in colour and weight making it ideal for shutters. The almost white timber stains to match most timbers accurately while the grain, reminiscent of oak, appears rich and exuberant even when painted.

THE SEATTLE RANGE

An engineered product constructed from an LVL core, LDF outer body and polymer coated in a choice of three white extremely durable finishes.

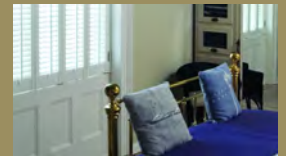

Mainly bought for its budget price but premium looks. This range is also the interior designer's contemporary choice.

THE HOLLYWOOD RANGE

A paint finished polymer shutter suitable for wetrooms, conservatories and other harsh environments.

The Hollywood range is available in six standard paint finishes etched on an ABS extruded outer skin with cedar stiffened stiles and capped hollow 63mm or 89mm louvres. If you need a tough, quality shutter, this is it.

SOLID RAISED

12mm thick centre panels with 28.6mm x 40mm stiles. Now with rebated top and bottom rail options for tier on tier for even less light infiltration.

SOLID BASE/LOUVRE TOP

As solid raised but with top louvres, very suitable for sliding partitions and French Windows with solid bases.

SOLID SHUTTERS

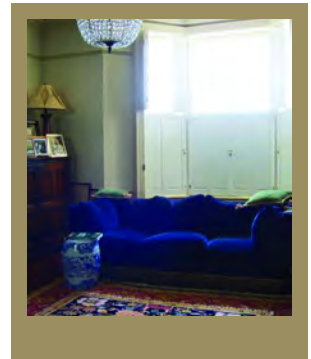

OUR SOLID RAISED PANEL SHUTTERS ARE OPTIONS ONLY FOR THE PHOENIX AND VANCOUVER RANGES.

Used extensively over the last couple of hundred years in the UK, solid shutters offer near blackout whilst also giving you almost complete insulation from noise, neighbours and casual burglars! (Security bars are available from some dealers or can be made and fitted by your local locksmith).

They are fitted in the same way as louvre shutters and are not generally suitable as replacements for Regency tapered reveal box fitting.

They are used a lot for folding/concertina tracked partitions and they make very good, superior, quality, light folding doors.

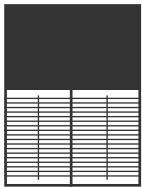

Available in Vancouver or Phoenix options.

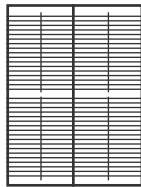

STYLES AND SHAPES

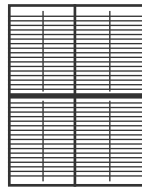

INTERIOR SHUTTERS OFFER A STYLISH ALTERNATIVE TO OTHER WINDOW DRESSINGS, AND WITH THEIR DIFFERENT STYLES ARE ABLE TO OFFER THE OPTIONS OF FULL HEIGHT, TIER ON TIER OR CAFE.

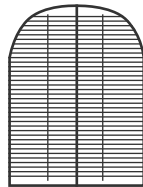

CAFE

FULL HEIGHT

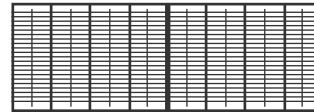

TIER ON TIER

SPECIAL SHAPES

TRACKING OPTION

(For widths greater than 220cm)

SHUTTER SHAPES

We are able to make shutters for all shaped windows and doors at affordable prices because we have developed new manufacturing technologies.

Shaped shutters are available only in the Vancouver and Phoenix ranges.

CONSERVATORY

CONSERVATORY SHUTTERS, APART FROM LOOKING GREAT, OFFER A DEGREE OF FLEXIBILITY SIMPLY NOT POSSIBLE WITH MOST OTHER SHADING OPTIONS. UNLIKE FABRIC BASED SHADING SYSTEMS, SHUTTERS WILL NOT ROT, SAG OR AGE PERCEPTIVELY AND ARE EASY TO CLEAN.

Shutters can be used on the sides as well, for long sections they can be mounted on top tracking to slide away when not in use.

Shutters are also used for partitioning and as multi-fold internal doors. Quite often the opening to the conservatory may have shutters suspended on a top track. The solid base and louvre top shutters are used extensively for these applications.

If your enquiry is for a conservatory application please make that clear when asking for your nearest dealer.

SHUTTER COLOURS

IT IS IMPORTANT TO SELECT THE CORRECT COLOUR FINISH TO SUIT YOUR ROOM. WE OFFER AN EXTENSIVE RANGE OF COLOUR SUITABLE FOR ALL ROOM DECORS.

Colours and stains represented here are to be used as a guideline only and do not reflect the true look of the finished product.

A full colour custom service for the Vancouver and Phoenix ranges are available for an additional cost.

FITTING

The safest way to fit shutters is to let your dealer fit them, however you can fit them yourself with reasonable DIY skills and assuming you have understood all the design and fitting options and then measured correctly. For DIY shutters contact us for advice or visit our website.

There are many ways to fit shutters and there is no one way that is better than another. You may fit them inside the reveal, the most common way, or on the edge of the reveal or outside the reveal, all are permissible methods. The room will generally dictate the fitting location.

Frames are used extensively for fitting but may not be suitable for severely out of square openings, (most openings in older houses are not perfectly square). Shutters are made square unless specially shaped and will not hide a subsided bay window or tilted window sill entirely.

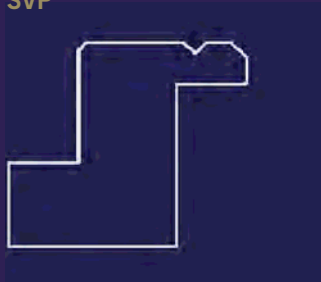

Our hinges are made especially for our shutters and our screws are made specifically for our hinges with matching screw heads. Either match or contrast hinges to shutters, sometimes odd combinations work very well, bisque hinges with silk white panels for instance. For wet environments it is recommended that our marine grade stainless steel hinges are used.
